You can economize by not buying—but we can't!

Why do we keep on building electric service facilities when costs are so high and our construction budget runs into many millions of dollars every year? That's a good question. And here's the answer: We need the facilities right now. We added approximately 70,000 new customers to Edison lines each year in four of the past five years. Actually, our customers used almost a billion kilowatt hours more in 1951 than in 1950—and when someone orders electricity by flicking a switch, we must be able to deliver it.

"Edison electricity is your best buy—you can depend on it!"
